John Zachary, Richard Brooks

April 2003 **Mobile Networks and Applications**, Volume 8 Issue 2Full text available: pdf(152.99 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Trust management in a networked environment consists of authentication and integrity checking. In a mobile computing environment, both remote hosts and mobile code are suspect. We present a model that addresses trust negotiation between the remote host and the mobile code simultaneously. Our model uses tamper resistant hardware, public key cryptography, and one-way hash functions.

Keywords: authentication, hash functions, mobile code, tamper resistant hardware, trust management

2 [A wireless public access infrastructure for supporting mobile context-aware IPv6 applications](#)

Adrian Friday, Maomao Wu, Stefan Schmid, Joe Finney, Keith Cheverst, Nigel Davies

July 2001 **Proceedings of the first workshop on Wireless mobile internet**Full text available: pdf(768.12 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper presents a novel wireless access point architecture designed to support the development of next generation mobile context-aware applications over metropolitan scale areas. In addition, once deployed, this network will allow ordinary citizens secure, accountable and convenient access to the Internet from their local city and campus environments.

The proposed architecture is based on an approach utilising a modified Mobile IPv6 protocol stack that uses packet marking ...

Keywords: authentication, mobile IPv6, public access point, security, wireless internet

3 [Using content-derived names for configuration management](#)

Jeffrey K. Hollingsworth, Ethan L. Miller

May 1997 **ACM SIGSOFT Software Engineering Notes , Proceedings of the 1997 symposium on Software reusability**, Volume 22 Issue 3
